

BIO SCULPTURE AUSTRALIA PRODUCT EDUCATION

Bio Sculpture Gel offers Product Training courses at numerous venues throughout Australia. We offer courses for beginners, experienced and advanced Nail Technicians including Nail Art courses. Our courses run regularly and we will always endeavour to accommodate people as soon as possible.

We encourage Nail Technicians to improve their skills by learning new and advanced methods, this will give them confidence to try new things and improve their services to their clients. Every product is different and if they know how to use their chosen product correctly, they will benefit from excellent results without wasting time, product and money plus losing clients due to lack of product knowledge.

The Bio Sculpture training courses are geared towards both qualified Nail Technicians and Beginners. We offer 'product training' where we teach nail technicians/beginners how to use our product. Our theory is 'Our product is only as good as the people using it', therefore, we firmly believe that training is of the utmost importance, and time spent on thorough training will certainly benefit the Nail Technician as well as their Bio Sculpture clientele. With good product knowledge (training) a Technician is able to make money and be a success!!

We offer a 'Starter Kit' that includes everything a Nail Technician needs to work with our system. As Bio Sculpture is a complete system, we strongly recommend that Technicians do not combine other products with our Gels, as this can often cause problems with the Gel. Included with the Starter Kit is our 'Lifetime training' course for one qualified Technician (additional fees will apply to train extra Technicians). In order to obtain a Bio Sculpture Certificate of Merit, all Nail Technicians are required to have their practical work assessed in a Bio Sculpture Exam covering both practical and theory. If they meet the required standard, we then issue them with a Bio Sculpture Certificate of Merit and Badge. Once certified and with specific salon requirements met, can we then highly recommend clients to them.

We include the International Bio Sculptures Nail Technician's Manual in the kit, which takes you step by step through each stage and has a trouble shooting section at the back. There is also a Bio Sculpture Training Course DVD currently being updated soon to be available for purchase once you have completed your training course as a backup tool to reinforce everything you have learnt.

Training, Training, Training
Bio Sculpture 'Lifetime Training' Agreement

Upgrade your training - Advance your skills to refine and improve the quality of your Bio Sculpture Gel Nails

Our Bio Sculpture Educators are continually advancing their skills to deliver the most advanced training and application techniques to you. A combination of new techniques and refined teaching methods will have you completing a 'perfect' set of nails every time. At Bio Sculpture, we understand that good education never really ends.

As a company we honour every enrolled Technician, with our Bio Sculpture Gel 'Lifetime Training'. This training includes FREE Refresher Classes and Exam Certificate Classes throughout the Technician's training lifetime whilst working with the Bio Sculpture Gel System. We now offer these Technicians our Advanced Classes with relevant Tool Kits (supplied when Fee paid) along with one FREE Advanced Class per annum to keep up our products high standards.

Included in 'Lifetime Training' are the following Gel Courses:-

INITIAL LIFETIME TRAINING

This course is for any qualified Nail Technicians or Beauty Therapists wanting to operate with the Bio Sculpture System.

- Introduction to our Products
- Preparation of the Nails
- Application of the Gel on Natural Nails - Colour and French overlay
- Nail repair using Gel and Silk
- Home After Care and Maintenance
- Infills with the Gel - Colour and French Infill
- Removal of the Gel - Soak Off with no damage to the natural nails - no buffing

REFRESHER COURSES

For Bio Sculpture Nail Technicians wishing to update their skills in any area of Gel Application. Recommended annually for maintaining a high standard of gel services

'CERTIFICATE OF MERIT' – ASSESSMENT

In order to obtain this Certificate all Nail Technicians must pass their assessment in the following areas. (Performed on a model supplied by the Technician.) On successful completion of the Practical and Theory of this course a Bio Sculpture Gel Australia 'Certificate of Merit'

will be issued

- Colour Gel Overlay on natural nails
- French Gel Overlay on natural nails
- Gel Infill
- Nail extension - Sculpture or Tip
- Nail Repair using silk
- Finishing off with S-Gel
- Soak Off
- Theory Exam

Bio Sculpture Gel 'Advanced Certificate'

In order to obtain this certificate a nail technician must achieve outstanding results. Grading between 80% - 95% on a set of Bio Sculpture French Gel Sculptures (one hand may be French overlay on tip application) completed within 3 hours. On successful completion of this course a Bio Sculpture Gel Australia 'Advanced Certificate' will be issued.

Bio Sculpture Gel 'A-Grade Certificate'

In order to obtain this certificate a nail technician must achieve outstanding results at competition level. Grading over 95% on a set of Bio Sculpture French Gel Sculptures completed within 2 hours. On successful completion of this course a Bio Sculpture Gel Australia 'A-Grade Certificate' will be issued.

The Advanced Certificate and A-Grade Certificate qualified individuals will be offered a higher level of recognition on our client referral system and in due time we are looking at the unique opportunity of such individuals having internet listings on the Bio Sculpture Gel website. This will recognise each individual for their achievements, with their contact details available to prospective clients for instant referrals. Let us help build your business today.
